

VUMI Canada International Health Insurance Program

Exclusive VIP international healthcare access for CPA Canada members

Through the CPA Canada Affinity Benefits Program, CPA Canada members now have access to an exclusive VUMI Canada International Health Insurance Program.

This preferred program was created for CPA Canada members who want broader healthcare options, more choice, and access to leading international doctors, advanced diagnostics, specialists, treatment options, hospitals, and world-renowned medical facilities around the world.

Most Canadians have healthcare coverage. What many do not have is a clear plan for healthcare access.

In Canada, access can take time. According to the Fraser Institute's 2025 *Waiting Your Turn* report, the median wait from family doctor referral to treatment across 12 medical specialties was 28.6 weeks. That is where VUMI Canada can provide meaningful value.

What is international health insurance?

International health insurance is private medical coverage designed to provide access to healthcare options beyond the traditional local system.

It is broader than short-term emergency coverage while away from home. The focus is access to care, provider choice, advanced diagnostics, specialist treatment, hospitals, and medical facilities internationally.

In simple terms, it gives members more options when timing, choice, and medical expertise matter.

Why VUMI Canada?

VUMI Canada is designed for people who want more control over how and where they access healthcare.

Through this exclusive CPA Canada member program, members can apply for preferred international health insurance coverage with access to medical providers and facilities around the world.

Is this worth learning more about?

This program may be worth exploring if you want more healthcare options for yourself or your family, access to international medical expertise and facilities, and a better understanding of how international health insurance can fit into your broader planning.
